## ***Patient Safety Comes First***

***“AI should heal, not harm.”***

Always validate your models  
clinically, test rigorously, and keep  
human oversight in the loop.

## ***Guard Data Like Gold***

***“HIPAA & GDPR aren’t just acronyms – they’re trust signals.”***

Encrypt, anonymize, & handle patient data with airtight compliance.

## ***Fairness Isn't Optional***

***“Bias in data = bias in care.”***

Use diverse, representative datasets to ensure equal outcomes across all demographics.

## *Make AI Explain Itself*

***“No black boxes in healthcare.”***

Clinicians and patients  
deserve clarity on how AI  
reaches its conclusions.

## Who's Accountable?

***“When AI misfires, who owns it?”***

Define liability clearly — whether it's the CTO, vendor, or clinician.

## Respect Patient Autonomy

***“Patients should know when  
AI is in the room.”***

Always secure informed consent  
& give them the right to opt out.

## *Design for Equity*

***“AI should close gaps, not widen them.”***

Build solutions with underserved populations in mind to reduce disparities.

## ***Keep AI on a Short Restriction***

***“Set it, but don’t forget it.”***

Continuous monitoring, audits,  
& governance frameworks keep systems  
accurate, fair, and compliant.
